Transgender Medicine: Primary and HIV Care

May 17, 2016

Program Overview

The purpose of this webinar is to enable participants to improve understanding of the sexual health needs of transgender persons.

Upon completion, participants will:

- Understand the terminology related to transgender health care, including hormonal therapies
- Describe the epidemiology of HIV among transgender persons
- Describe structural barriers and best practices for care for HIV-infected transgender persons

Intended Audience

Physicians, Physician Assistants, Nurses, Nurse Practitioners, Social Workers, Case Managers, and other members of the HIV treatment team

This activity qualifies for 1.0 contact hours.

Featured Speaker

Asa Radix, MD, MPH, FACP, AAHIVS
Senior Director of Research and Education
Callen-Lorde Community Health Center
New York, NY

Asa Radix is the Director of Research and Education at The Callen Lorde Community Health Center in New York. Asa trained in internal medicine, infectious diseases and public health at the University of Connecticut Health Center.

In addition to having a clinical practice focusing on HIV primary care and transgender health, Asa coordinates electives in LGBT Health for medical and nursing students and holds faculty positions at NYU and Yale. Dr. Radix has been a board member of the Gay and Lesbian Medical Association, the National LGBT Advisory Council, the American Conference for Treatment of HIV, associate editor of Transgender Health and member of the editorial boards for the international Journal of Transgenderism and the PRN Notebook. Other contributions include being an advisor for the World Health Organization/PAHO on HIV, STI and transgender health issues. Dr. Radix is the site-PI/co-investigator for 3 NIH/NIMH studies, including a demonstration project on PrEP.
